Equity Trustees' responsibilities and obligations as the Fund's responsible entity are governed by the Fund's constitution ("Constitution"), the Corporations Act and general trust law. Inspire Australian Equities Pty Ltd

Inspire Australian Equities Pty Ltd ABN 56 635 773 974 ("Inspire" or "Investment Manager") is the Investment Manager of the Fund and is an authorised representative of Liverpool Partners Pty Ltd (AFSL 429777).

2. How the Inspire Australian Equities Fund works

The Fund is a registered managed investment scheme governed by the Constitution. The Fund comprises assets which are acquired in accordance with the Fund's investment strategy. Direct investors receive units in the Fund when they invest. In general, each unit represents an equal interest in the assets of the Fund subject to liabilities; however, it does not give investors an interest in any particular asset of the Fund.

If you invest in the Fund through an IDPS (as defined in the Reference Guide) you will not become an investor in the Fund. The operator or custodian of the IDPS will be the investor entered in the Fund's register and will be the only person who is able to exercise the rights and receive the benefits of a direct investor. Your investment in the Fund through the IDPS will be governed by the terms of your IDPS. Please direct any queries and requests relating to your investment to your IDPS Operator. Unless otherwise stated, the information in the PDS applies to direct investors.

Applying for units

You can acquire units by completing the Application Form that accompanies this PDS. The minimum initial investment amount for the Fund is \$10,000.

Completed Application Forms should be sent along with your identification documents (if applicable) to:

Mainstream Fund Services Pty Ltd
Client Services Registry Team
GPO Box 4968
Sydney, NSW, 2001

Please note that cash and cheques cannot be accepted.

We reserve the right to accept or reject applications in whole or in part at our discretion. We have the discretion to delay processing applications where we believe this to be in the best interest of the Fund's investors.

The price at which units are acquired is determined in accordance with the Constitution ("Application Price"). The Application Price on a Business Day is, in general terms, equal to the Net Asset Value ("NAV") of the Fund, divided by the number of units on issue and adjusted for transaction costs ("Buy Spread"). At the date of this PDS, the Buy Spread is 0.40%.

The Application Price will vary as the market value of assets in the Fund rises or falls.

Making additional investments

You can make additional investments into the Fund at any time by sending us your additional investment amount together with a completed Additional Application Form. The minimum additional investment into the Fund is \$2,500.

Distributions

An investor's share of any distributable income is calculated in accordance with the Constitution and is generally based on the number of units held by the investor at the end of the distribution period.

The Fund usually distributes income annually at the end of June. Distributions are calculated effective the last day of each distribution period and are normally paid to investors as soon as practicable after the distribution calculation date.

Investors in the Fund can indicate a preference to have their distribution:

- reinvested back into the Fund; or
- directly credited to their AUD Australian domiciled bank account.

Investors who do not indicate a preference will have their distributions automatically reinvested. Applications for reinvestment will be taken to be received immediately prior to the next Business Day after the relevant distribution period. There is no Buy Spread on distributions that are reinvested.

In some circumstances, the Constitution may allow for an investor's withdrawal proceeds to be taken to include a component of distributable income.

Indirect Investors should review their IDPS Guide for information on how and when they receive any income distribution.

Access to your money

Investors in the Fund can generally withdraw their investment by completing a written request to withdraw from the Fund and mailing it to:

Mainstream Fund Services Pty Ltd
Client Services Registry Team
GPO Box 4968
Sydney, NSW, 2001

or by fax to +61 2 9221 1194

The minimum withdrawal amount is \$2,500. Once we receive and accept your withdrawal request, we may act on your instruction without further enquiry if the instruction bears your account number or investor details and your (apparent) signature(s), or your authorised signatory's (apparent) signature(s).

Equity Trustees will generally allow an investor to access their investment within 21 days of acceptance of a withdrawal request by transferring the withdrawal proceeds to such investor's nominated bank account. However, Equity Trustees is allowed to reject withdrawal requests, and also to make payment up to 30 days after acceptance of a request (which may be extended in certain circumstances) as outlined in the Constitution and Reference Guide.

We reserve the right to accept or reject withdrawal requests in whole or in part at our discretion.

The price at which units are withdrawn is determined in accordance with the Constitution ("Withdrawal Price"). The Withdrawal Price on a Business Day is, in general terms, equal to the NAV of the Fund, divided by the number of units on issue and adjusted for transaction costs ("Sell Spread"). At the date of this PDS, the Sell Spread is 0.40%.

The Withdrawal Price will vary as the market value of assets in the Fund rises or falls.

Equity Trustees reserves the right to fully redeem your investment if your investment balance in the Fund falls below \$10,000 as a result of processing your withdrawal request. In certain circumstances, for example, when there is a freeze on withdrawals, where accepting a withdrawal is not in the best interests of investors in the Fund including due to one or more circumstances outside its control or where the Fund is not liquid (as defined in the Corporations Act), Equity Trustees can deny or suspend a withdrawal request and you may not be able to withdraw your funds in the usual processing times or at all. When the Fund is not liquid, an investor can only withdraw when Equity Trustees makes a withdrawal offer to investors in accordance with the Corporations Act. Equity Trustees is not obliged to make such offers.

If you are an Indirect Investor, you need to provide your withdrawal request directly to your IDPS Operator. The time to process a withdrawal request will depend on the particular IDPS Operator and the terms of the IDPS.

Unit pricing discretions policy

Equity Trustees has developed a formal written policy in relation to the guidelines and relevant factors taken into account when exercising any discretion in calculating unit prices (including determining the value of the assets and liabilities). A copy of the policy and, where applicable and to the extent required, any other relevant documents in relation to the policy will be made available free of charge on request.

Additional information

If and when the Fund has 100 or more direct investors, it will be classified by the Corporations Act as a 'disclosing entity'. As a disclosing entity, the Fund will be subject to regular reporting and disclosure obligations. Investors would then have a right to obtain a copy, free of charge, of any of the following documents:

- the most recent annual financial report lodged with ASIC ("Annual Report");
- any subsequent half yearly financial report lodged with ASIC after the lodgement of the Annual Report; and
- any continuous disclosure notices lodged with ASIC after the Annual Report but before the date of this PDS.

Equity Trustees will comply with any continuous disclosure obligation by lodging documents with ASIC as and when required.

Copies of these documents lodged with ASIC in relation to the Fund may be obtained from ASIC through ASIC's website.

4. Risks of managed investment schemes

All investments carry risks. Different investment strategies may carry different levels of risk, depending on the assets acquired under the strategy. Assets with the highest long-term returns may also carry the highest level of short-term risk. The significant risks below should be considered in light of your risk profile when deciding whether to invest in the Fund. Your risk profile will vary depending on a range of factors, including your age, the investment time frame (how long you wish to invest for), your other investments or assets and your risk tolerance.

The Responsible Entity and Investment Manager do not guarantee the liquidity of the Fund's investments, repayment of capital or any rate of return or the Fund's investment performance. The value of the Fund's investments will vary. Returns are not guaranteed and you may lose money by investing in the Fund. The level of returns will vary and future returns may differ from past returns. Laws affecting managed investment schemes may change in the future. The structure and administration of the Fund is also subject to change.

In addition, we do not offer advice that takes into account your personal financial situation, including advice about whether the Fund is suitable for your circumstances. If you require personal financial or taxation advice, you should contact a licensed financial adviser and/or taxation adviser.

Market risk

Investors should be aware that there are risks inherent in the holding of securities:

- An investment may fall in value due to changes in market sentiment or economic, technological, political or legal conditions.
- Past performance is no guide to the future. The value of units, and any income from them, can go down as well as up, particularly in the short term, meaning that an investment may not be returned in full.
- The tax treatment of the Fund may change and such changes cannot be foreseen.
- Where regular investments are made with the intention of achieving a specific capital sum in the future, this will normally be subject to maintaining a specified level of investment.

International Investments

The Fund invests in international investments which may involve certain risks, including fluctuations in foreign exchange rates, future political and economic developments and the possible imposition of exchange controls or other governmental laws or restrictions. Security prices in different countries are subject to different economic, financial, political and social factors. In addition, investments may be subject to non-recoverable withholding taxes.

Liquidity risk

Investments that trade less can be more difficult or more costly to buy, or to sell, than more liquid or active investments. It may not be possible to sell or otherwise dispose of illiquid securities both at the price and within a time period deemed desirable by the Investment Manager.

Portfolio turnover risk

The Fund does not intend to trade, directly or indirectly, portfolio securities for the purpose of realising short-term profits. However, the Investment Manager will adjust the Fund's portfolio as considered advisable in view of prevailing or anticipated market conditions and the Fund's investment objective, and there is no limitation on the length of time securities must be held, directly or indirectly, by the Fund prior to being sold. Portfolio turnover rate will not be a limiting factor and will vary from year to year. Higher portfolio turnover rates involve correspondingly higher transaction costs, which are borne directly or indirectly by the Fund. In addition, the Fund may realise significant short term and long-term capital gains.

Derivatives risk

The Fund may make use of exchange-traded derivatives, including, but not limited to, futures, options and contracts for differences, as part of its investment policy. Derivatives may be used to manage equity and foreign exchange risk, subject to the Investment Guidelines (see "About the Fund Investments"). Derivatives are highly specialised instruments that require investment techniques and risk analysis different from those associated with equities and debt securities. The use of a derivative requires an understanding not only of the underlying instrument but also of the derivative itself. In particular, the use and complexity of derivatives require the maintenance of adequate controls to monitor the transactions entered into and the ability to assess the risk that a derivative transaction adds to a portfolio. As such, there can be no guarantee or assurance that the use of derivatives will meet or assist in meeting the investment objectives of the Fund.

Derivatives can be highly volatile and expose investors to a high risk of loss. The low initial margin deposits normally required to establish a position in such instruments permit a high degree of leverage. As a result, depending on the type of instrument, a relatively small movement in the price of a contract may result in a profit or a loss which is high in proportion to the amount of funds actually placed as initial margin and may result in unquantifiable further loss exceeding any margin deposited. In addition, daily limits on price fluctuations and speculative position limits on exchanges may prevent prompt liquidation of positions resulting in potentially greater losses.

Fixed interest securities risk

Fixed interest securities are particularly affected by trends in interest rates and inflation. If interest rates increase, capital values may fall and vice versa. Inflation will erode the real value of capital. In addition, companies may not be able to honour repayment on bonds they issue.

Foreign exchange risk

The Net Asset Value ("NAV") of the Fund will be computed in the base currency (AUD) whereas the investments held for the account of the Fund may be acquired in other currencies. The Fund's NAV may change significantly when the currencies other than the base currency in which some of the Fund's investments are denominated strengthen or weaken against the base currency. Currency exchange rates generally are determined by supply and demand in the foreign exchange markets, and the perceived relative merits of investments in different countries. Currency exchange rates can also be affected in unpredictable ways by intervention by government or central banks, or by currency controls or political developments.

In addition, currency hedging transactions, while potentially reducing the currency risks to which the Fund would otherwise be exposed, involve certain other risks, including the risk of a default by a counterparty. Additionally, where the Fund enters into "cross-hedging" transactions (e.g., utilising a currency different from the currency in which the security being hedged is denominated), the Fund will be exposed to the risk that changes in the value of the currency used to hedge will not correlate with changes in the value of the currency in which the securities are denominated, which could result in loss on both the hedging transaction and the value of the securities held by the Fund.

Forward currency contracts and currency futures involve the possibility that the market for them may be limited with respect to certain currencies and, upon a contract's maturity, the possible inability to negotiate with the dealer to enter into an offsetting transaction. There is no assurance that an active forward currency contract market will always exist. These factors restrict the ability to hedge against the risk of devaluation of currencies in which a substantial quantity of securities are being held for the Fund and are unrelated to the qualitative rating that may be assigned to any particular security.

Legal risk

There is a risk that laws, including tax laws, might change or become difficult to enforce.

Net Asset Value ("NAV")

Whilst the Fund may use the latest available published price in respect of each investment in order to calculate the NAV, it reserves the right to use more recent valuations where this is considered appropriate. Such valuations may be based on an estimate of a more recent price of any unit or share in an underlying investment fund or other collective investment undertaking in which the Fund invests obtained from or calculated on the basis of more recent information received from the underlying fund or undertaking, or any of its service providers or agents.

Investor suitability

The Fund is generally suited for persons seeking long-term capital growth and those who can tolerate a high level of risk. You should speak with your financial adviser before investing in the Fund.

Investment style and approach

The Inspire Australian Equities Fund seeks to invest in companies listed primarily on the Australian Stock Exchange ("ASX") that have a positive social and/or environmental impact. The purpose of the Fund is "impact first". This means each company in the portfolio is selected for the positive impact that is achieved by their main business activity.

The portfolio mainly comprises companies with small or mid-market capitalisations (i.e. outside of the top 100 ASX companies). This reflects the investable universe of positive impact companies listed on the ASX. Inspire is a small companies' specialist and has a strong investment performance track record in this sector.

For each potential portfolio company, the Inspire investment team ("Portfolio Managers") seeks to establish that the main business activity has a positive social and/or environmental impact and looks for indicators of that impact to measure over time. Companies that meet these criteria are included in the Inspire Impact Universe. The Portfolio Managers then analyse the corporate fundamental strength, including management, income statement, balance sheet and cash flow statement. Provided that the corporate fundamental strength is assessed as investment grade, then an exit valuation is determined for each company. The Portfolio Managers construct the portfolio from the Inspire Impact Universe, selecting companies based on the potential return and the corporate fundamental strength. The Portfolio Managers consider a range of factors to determine the portfolio weighting for each company including the expected return, fundamental risk, liquidity and diversification by impact category and industry.

Asset allocation

The Fund will invest substantially all of its assets in securities of Australian and New Zealand companies, but may invest internationally. The Fund may invest in trusts that in turn invest in eligible securities.

The target asset mix of the Fund is expected to be achieved within the following parameters:

- Maximum of 100% in securities listed on Australian or New Zealand exchanges
- Maximum of 10% in securities listed on international exchanges;
- Maximum of 10% of the portfolio in securities related to any one entity at time of purchase;
- Maximum cash weighting of 20% - this maximum may be exceeded at times, for example if the portfolio experiences strong inflows;
- Exchange traded derivatives may be used to manage portfolio risk;
- No borrowing except for short term operational needs;
- No short selling;
- No gearing. The Investment Manager is not permitted to use derivative contracts, physical securities or any combination of the two to produce financial exposure that would result in the gearing of the portfolio (ie such that net share market exposure is greater than 100%).

These parameters are targets only and the actual allocations may differ from time to time, as the value of assets change and opportunities for investment become available.

Changing the investment strategy

The investment strategy and asset allocation parameters may be changed. If a change is to be made, investors in the Fund will be notified in accordance with the Corporations Act.

Labour, environmental, social and ethical considerations

The Investment Manager takes into account social and environmental considerations for the purposes of selecting, retaining or realising investments, but does not generally take labour standards or ethical considerations into account.

Fund performance

Up to date information on the performance of the Fund can be obtained from www.inspireimpact.com.au. A free of charge paper copy of the information will also be available on request.

6. Fees and costs

DID YOU KNOW?

Small differences in both investment performance and fees and costs can have a substantial impact on your long-term returns.

For example, total annual fees and costs of 2% of your account balance rather than 1% could reduce your final return by up to 20% over a 30 year period (for example, reduce it from \$100,000 to \$80,000).

You should consider whether features such as superior investment performance or the provision of better member services justify higher fees and costs.

You may be able to negotiate to pay lower contribution fees and management costs where applicable. Ask the fund or your financial adviser.

TO FIND OUT MORE

If you would like to find out more, or see the impact of the fees based on your own circumstances, the [Australian Securities and Investments Commission \(ASIC\)](http://www.moneywise.gov.au) website (www.moneywise.gov.au) has a managed funds fee calculator to help you check out different fee options.

The information in the following template can be used to compare costs between different simple managed investment schemes. Fees and costs can be paid directly from an investor's account or deducted from investment returns. For information on tax please see Section 7 of this PDS.

Any underperformance from a prior period must be recouped before a fee can be taken (we call this the high-watermark)³</p>

¹ All fees quoted above are inclusive of Goods and Services Tax (GST) and net of any Reduced Input Tax Credits (RITC). See below for more details as to how management costs are calculated.

² Management fees can be negotiated. See "Differential fees" below.

³ This represents the performance fees which are payable as an expense of the Fund to the Investment Manager. See "Performance fees" below for more information.

Additional Explanation of fees and costs

What do the management costs pay for?

Management costs comprise the additional fees or costs that an investor incurs by investing in the Fund rather than by investing directly in the underlying assets of the Fund. Management costs include management fees and performance fees.

In addition, management costs do not include transactional and operational costs (i.e. costs associated with investing the underlying assets, some of which may be recovered through Buy/Sell Spreads).

Management fees

The management fees of 1.39% p.a. of the NAV of the Fund are payable to the Responsible Entity of the Fund for managing the assets and overseeing the operations of the Fund. The management fees are accrued daily and paid from the Fund monthly in arrears and reflected in the unit price. As at the date of this PDS, ordinary expenses such as investment management fees, custodian fees (excluding transaction-based fees such as trading or settlement costs incurred by the custodian), administration and audit fees, and other ordinary expenses of operating the Fund are covered by the management fees at no additional charge to you.

The management fees shown above do not include extraordinary expenses (if they are incurred in future), such as litigation costs and the costs of convening investor meetings.

Performance fees

Performance fees are payable to the Investment Manager where the investment performance of the Fund exceeds the performance of the S&P/ASX All Ordinaries Index. The performance fees are 20.50% of this excess, calculated daily and paid for each six month period ending 30 June and 31 December in arrears from the Fund. The daily performance fee is calculated based on start of day NAV of the Fund each day, adjusted for applications and redemptions, in the relevant six month period. No performance fees are payable until any accrued underperformance relative to the index (in dollar terms and adjusted for applications, withdrawals and distributions) from prior periods has been made up (this feature is sometimes referred to as a high-watermark).

Based on the current calculation methodology for the performance fee, the Responsible Entity has estimated that the typical ongoing performance fee payable per annum may be \$0 assuming an average account balance of \$50,000 during the year. Prior periods have been taken into account in calculating this estimate. However, this is not a forecast as the actual performance fee for the current and future financial years may differ. The Responsible Entity cannot guarantee that performance fees will remain at their previous level or that the performance of the Fund will outperform the benchmark.

It is not possible to estimate the actual performance fee payable in any given period, as we cannot forecast what the performance of the Fund will be, but it will be reflected in the management costs for the Fund for the relevant year. Information on current performance fees will be updated from time to time and available at www.eqt.com.au/insto or www.inspireimpact.com.au.

Transactional and operational costs

In managing the assets of the Fund, the Fund may incur transactional and operational costs such as brokerage, settlement costs, clearing costs and applicable stamp duty when assets are bought and sold, and the costs of derivatives used for hedging purposes (if applicable). This generally happens when the assets of a fund are changed in connection with day-to-day trading or when there are applications or withdrawals which cause net cash flows into or out of a fund.

The Buy/Sell Spread is a reasonable estimate of transaction costs that the Fund will incur when buying or selling assets of the Fund. These costs are an additional cost to the investor but are incorporated into the unit price and arise when investing application monies and funding withdrawals from the Fund and are not separately charged to the investor. The Buy Spread is paid into the Fund as part of an application and the Sell Spread is left in the Fund as part of a redemption and not paid to Equity Trustees or the Investment Manager. The estimated Buy/Sell Spread is 0.40% upon entry and 0.40% upon exit. The dollar value of these costs based on an application or a withdrawal of \$10,000 is \$40 for each individual transaction. The Buy/Sell Spread can be altered by the Responsible Entity at any time. The Responsible Entity may also waive the Buy/Sell Spread in part or in full at its discretion.

Transactional costs which are incurred other than in connection with applications and withdrawals arise through the day-to-day trading of the Fund's assets and are reflected in the Fund's unit price. As these costs are factored into the NAV of the Fund and reflected in the unit price, they are an additional implicit cost to the investor and are not a fee paid to the Responsible Entity. These costs can arise as a result of bid-offer spreads (the difference between an asset's bid/buy price and offer/ask price) being applied to securities traded by the Fund. Liquid securities generally have a lower bid-offer spread while less liquid assets have a higher bid-offer spread reflecting the compensation taken by market makers in providing liquidity for that asset.

During the financial year ended 30 June 2019, the total transaction costs for the Fund were 0.72% of the NAV of the Fund, of which 19.59% of these transaction costs were recouped via the Buy/Sell Spread, resulting in a net transactional cost to the Fund of 0.58% p.a. However, such costs for future years may differ.

Can the fees change?

Yes, all fees can change without investor consent, subject to the maximum fee amounts specified in the Constitution. Equity Trustees has the right to recover all reasonable expenses incurred in relation to the proper performance of its duties in managing the Fund and as such these expenses may increase or decrease accordingly. We will generally provide investors with at least 30 days' notice of any proposed change to the management costs. In most circumstances, the Constitution defines the maximum level that can be charged for fees described in this PDS. Expense recoveries may change without notice, for example, when it is necessary to protect the interests of existing members and if permitted by law.

Payments to IDPS Operators

Subject to the law, annual payments may be made to some IDPS Operators because they offer the Fund on their investment menus. Product access is paid by the Investment Manager out of its management fees and is not an additional cost to the investor. If the payment of annual fees to IDPS Operators is limited or prohibited by the law, Equity Trustees will ensure the payment of such fees is reduced or ceased.

Differential fees

The Responsible Entity or Investment Manager may from time to time negotiate a different fee arrangement (by way of a rebate or waiver of fees) with certain investors who are Australian Wholesale Clients.

Example of annual fees and costs for the Fund

This table gives an example of how the fees and costs for this managed investment product can affect your investment over a 1 year period. You should use this table to compare this product with other managed investment products.

EXAMPLE – Inspire Australian Equities Fund

BALANCE OF \$50,000 WITH A CONTRIBUTION OF \$5,000 DURING THE YEAR

Contribution Fees	Nil	For every additional \$5,000 you put in, you will be charged \$0
Plus		
Management costs Comprising:		And , for every \$50,000 you have in the Fund you will be charged \$755 each year comprising:
Management fees:	1.51% p.a.	
Performance fees:	1.39% p.a.	\$695
	0.12% p.a.	\$60
Equals		
Cost of Fund		If you had an investment of \$50,000 at the beginning of the year and you put in an additional \$5,000 during that year, you would be charged fees of: \$755* What it costs you will depend on the fees you negotiate.

This example assumes the \$5,000 contribution occurs at the end of the first year, therefore management costs are calculated using the \$50,000 balance only.

* Additional fees may apply. Please note that this example does not capture all the fees and costs that may apply to you such as the Buy/Sell Spread.

The performance fees stated in this table shows the actual performance fees for the financial year ended 30 June 2019 as a percentage of the Fund's average NAV. The performance of the Fund, and the performance fees, may be higher or lower or not payable in the future. As a result, the management costs may differ from the figure shown in the table. It is not a forecast of the performance of the Fund or the amount of the performance fees in the future. See also above (under the heading "Performance fees") our estimated typical ongoing performance fees payable per annum. The actual performance fees for the current financial year and for future financial years may differ. For more information on the performance history of the Fund, visit Equity Trustees' website at www.eqt.com.au/insto. Past performance is not a reliable indicator of future performance.

Warning: If you have consulted a financial adviser, you may pay additional fees. You should refer to the Statement of Advice or Financial Services Guide provided by your financial adviser in which details of the fees are set out.

ASIC provides a fee calculator on www.moneysmart.gov.au, which you may use to calculate the effects of fees and costs on account balances.

7. How managed investment schemes are taxed

Warning: Investing in a registered managed investment scheme (such as the Fund) is likely to have tax consequences. You are strongly advised to seek your own professional tax advice about the applicable Australian tax (including income tax, GST and duty) consequences and, if appropriate, foreign tax consequences which may apply to you based on your particular circumstances before investing in the Fund.

The Fund is an Australian resident for tax purposes and does not generally pay tax on behalf of its investors. Australian resident investors are assessed for tax on any income and capital gains generated by the Fund to which they become presently entitled or, where the Fund has made a choice to be an Attribution Managed Investment Trust ("AMIT") and the choice is effective for the income year, are attributed to them.

You should read the important information about Taxation under the "Other important information" section before making a decision. Go to the Reference Guide which is available at www.inspireimpact.com.au. The material relating to these matters may change between the time when you read this PDS and the day when you acquire the product.

8. How to apply

To invest please complete the Application Form accompanying this PDS, send funds (see details in the Application Form) and your completed Application Form to:

Mainstream Fund Services Pty Ltd
Client Services Registry Team
GPO Box 4968
Sydney, NSW, 2001

Please note that cash and cheques cannot be accepted and all applications must be made in Australian dollars.

Who can invest?

Eligible persons (as detailed in the 'About this PDS' section) can invest, however individual investors must be 18 years of age or over.

Investors investing through an IDPS should use the application form provided by their IDPS Operator.

Cooling off period

If you are a Retail Client who has invested directly in the Fund, you may have a right to a 'cooling off' period in relation to your investment in the Fund for 14 days from the earlier of:

- confirmation of the investment being received; and
- the end of the fifth business day after the units are issued.

A Retail Client may exercise this right by notifying Equity Trustees in writing. A Retail Client is entitled to a refund of their investment adjusted for any increase or decrease in the relevant Application Price between the time we process your application and the time we receive the notification from you, as well as any other tax and other reasonable administrative expenses and transaction costs associated with the acquisition and termination of the investment.

The right of a Retail Client to cool off does not apply in certain limited situations, such as if the issue is made under a distribution reinvestment plan, switching facility or represents additional contributions required under an existing agreement. Also, the right to cool off does not apply to you if you choose to exercise your rights or powers as a unit holder in the Fund during the 14 day period. This could include selling part of your investment or switching it to another product.

Indirect Investors should seek advice from their IDPS Operator as to whether cooling off rights apply to an investment in the Fund by the IDPS. The right to cool off in relation to the Fund is not directly available to an Indirect Investor. This is because an Indirect Investor does not acquire the rights of a unit holder in the Fund. Rather, an Indirect Investor directs the IDPS Operator to arrange for their monies to be invested in the Fund on their behalf. The terms and conditions of the IDPS Guide or similar type document will govern an Indirect Investor's investment in relation to the Fund and any rights an Indirect Investor may have in this regard.

***Terms and conditions for collection of Tax File Numbers (TFN) and Australian Business Numbers (ABN)**

Collection of TFN and ABN information is authorised and its use and disclosure strictly regulated by tax laws and the Privacy Act. Once provided, your TFN will be applied automatically to any future investments in the Fund/Trust where formal application procedures are not required (e.g. distribution reinvestments), unless you indicate, at any time, that you do not wish to quote a TFN for a particular investment. Exempt investors should attach a copy of the certificate of exemption. For super funds or trusts list only the applicable ABN or TFN for the super fund or trust.
