

# FUTURE SUPER PENSION MEMBER OUTCOMES ASSESSMENT

## INTRODUCTION

In this report, Equity Trustees Superannuation Limited publishes the results of our annual assessment of how well the Future Super Pension product (the **product**) issued from Future Super Fund (the **fund**) provides member outcomes and promotes members' financial interests. The assessment is based on information as at 30 June 2023.

## METHODOLOGY AND STRUCTURE

In conducting this assessment, we compared the product to other choice superannuation products included in statistical data published by the Australian Prudential Regulation Authority (**comparable products**) using the criteria in Part 6 of the *Superannuation Industry (Supervision) Act 1993* and Prudential Standard SPS 515 *Strategic Planning and Member Outcomes*.

This report includes:

- our overall assessment of whether the product provides optimal member outcomes and promotes their financial interests;
- a dashboard that depicts our assessment of the product's market-relative performance for each outcome we aim to provide members;
- a table summarising the key metrics that we relied on when making this assessment; and
- our commentary on this performance that includes action items to improve suboptimal performance.

For each member outcome, the dashboard presents the relevant segment of market performance. The width of each segment is based on the range of market performance for each outcome and is specific to each outcome. The positioning of the black performance indicator bar against the colour coding is our assessment of how well the outcome has been delivered. The colour coding gives a visual representation of performance that moves from neutral (yellow) through orange to least tolerance (red), and in the opposite direction from yellow to the target (or green) area of the dashboard. The assessment of each member outcome is based on several equally-weighted metrics. Accordingly, if one metric is outside our tolerance level it doesn't automatically mean the entire member outcome is outside our tolerance level.

*Example dashboard for illustrative purposes only*

The target is generally the average position of the comparable products while the tolerance level is the trigger for us to consider any necessary actions to improve member outcomes.

Please visit our [website](#) to view a short video that provides more information about the operation of the dashboard.

# OVERALL ASSESSMENT

Having carefully considered the comparisons of the product with comparable products set out in this report, including the dashboards, metrics, commentary, and other relevant information available to us at the time of writing, we have concluded that as a result of the following factors the product is promoting members’ financial interests:

1. the fees and costs that affect the return to members are appropriate having regard to their financial interests;
2. the net returns for the product (i.e. returns after deducting all fees, costs and taxes) are consistent with market rates;
3. the investment strategy for the product is appropriate;
4. the options, benefits and facilities offered in the product are appropriate for members;
5. the scale of the product and the fund does not disadvantage members.

## DASHBOARD

### STRATEGIC CONTEXT

Working together with the fund’s promoter, Future Super Investment Services, our purpose is to build a prosperous future free from climate change and inequality. The fund's mission is to lead the movement to use the power of money to invest, advocate and campaign for a future worth retiring into. The fund's vision is for all of Australia's savings to be invested to eliminate climate change and inequality.

To support this purpose, our goals for the fund are to deliver a relevant, convenient and differentiated member experience, deliver quality, cost effective results for members and to help members and their dependents meet their superannuation needs so they are financially secure for retirement.

The product is a choice pension product.

### INVESTMENT RETURN

**Outcomes** Investment return for a \$50,000 account balance in the product<sup>1.0</sup> is consistent with market indexes.

Metrics	Ref	Metric Label	Value	Tolerance	Target
	1.1	1-year actual net return	12.99%	9.23%	9.68%
	1.2	3-year actual net return	6.02%	6.51%	7.25%
	1.3	5-year actual net return	7.21%	5.12%	5.52%

1.0 Investment returns and associated targets and tolerance levels are weighted averages for the product. The weighted averages are based on the performance, asset allocation and funds under management of the investment options available in the product. The table in Appendix 1 provides more information.

1.1 – 1.3 The product’s fee structure leads to different net returns for different account balances. The table in Appendix 2 provides more information.

1.2 – 1.3 Net returns are based on historic returns and the current fee structure.

### Commentary

The performance indicator measures the average investment return of all investment options in the product over one, three and 5-year periods and is based on an equal weighting of all the metrics in the above table.

Appendix 1 displays the returns for each investment option available in the product and its weighted average returns over

these periods.

This commentary focuses on the five-year weighted average return to 30 June 2023. The 5 year term is a balance between capturing any shorter term developments with the longer term trend of return performance.

It is important to note that we became trustee of the fund effective 1 July 2023.

When reading this commentary, it’s important to bear in mind that past performance is not a reliable indicator of future performance.

Over the five years to 30 June 2023 the product’s weighted average investment return was within our tolerance level.

Therefore, we consider the investment strategy for the product is appropriate because the weighted average returns are within our tolerance level.

## INVESTMENT RISK

<b>Outcomes</b>	Investment risk for a \$50,000 account balance in the product is consistent with the Standard Risk Measure (SRM) <sup>2.0</sup> .				
<b>Our product’s performance relative to comparable products</b>					

Metrics	Ref	Metric Label	Value	Tolerance	Target
	2.1	Negative annual net returns over last 10 years	1.00	2.00	1.00

2.0 Negative annual returns and associated targets and tolerance levels are weighted averages for the product. The weighted averages are based on the performance, SRM and funds under management of the investment options available in the product. Portions of years have been rounded up or down to a whole year.

### Commentary

The performance indicator measures the weighted average number of negative annual returns since the product's inception.

When reading this commentary, it’s important to bear in mind that past performance is not a reliable indicator of future performance.

Since the product's inception the weighted average number of negative returns for the product was within our tolerance level.

Therefore, we consider the investment risk is acceptable because the weighted average number of negative returns is within our tolerance level.

## FEES AND COSTS

**Outcomes** Fees (gross of tax) for a \$50,000 account balance are consistent with market rates.<sup>4.0</sup>

Metrics	Ref	Metric Label	Value	Tolerance	Target
	4.1	Total fees	0.94%	1.80%	1.30%

4.0 The product's fee structure leads to different net returns for different account balances. The table in the Appendix 2 provides more information.

4.1 These fees include a weighted average investment fee that is based on the investment fees and funds under management of the investment options available in the product.

### Commentary

This table lists the product's total fees and costs (administration and investment fees and costs). Other fees may be payable which are set out in the product's disclosure documents.

The performance indicator measures total fees and costs together against comparable products.

Total fees were within our tolerance level.

As a result, we are comfortable that fees and costs are consistent with market rates and therefore are appropriate having regard to members financial interests.

## MEMBER SERVICES

**Outcomes** Administration services satisfy member expectations.

Metrics	Ref	Metric Label	Value	Tolerance	Target
	8.2	Service Level Achievement	100.00%	80.00%	90.00%
	8.3	Administration fees	0.62%	0.62%	0.38%
	8.4	Information security controls	Effective	Partially ..	Effective

8.2 Service level achievement measures the portion of new member, contribution and benefit payment transactions that were processed within our service level.

8.3 This is our view of the effectiveness of the Administrator's information and cyber security controls based on an independent review completed during the year.

### Commentary

The performance indicator measures the delivery of administration services against our service levels, and against the cost of similar services for comparable products.

The performance indicator, which is within our tolerance level, is based on an equal weighting of the above metrics.

Administration fees were consistent with our tolerance level. No action is required as a result of this assessment.

As a result, we are comfortable that administration services satisfy member expectations because of the high rate of service level achievement, administration fees and costs are consistent with our tolerance level and the administrator’s information and cyber security controls are effective.

Therefore, we consider the options, benefits and facilities offered in the product are appropriate for members.

## SCALE

**Outcomes** The fund is sustainable and likely to deliver optimal outcomes in the future.

Metrics	Ref	Metric Label	Value	Tolerance	Target
	9.1	RSE adjusted total accounts growth rate	25.32%	-6.25%	-2.50%
	9.2	RSE Net Cash Flow Ratio	25.48%	-2.75%	-0.50%
	9.3	RSE Net Rollover Ratio	14.53%	-3.00%	-1.75%

9.1 The RSE adjusted total accounts growth rate is the average annual percentage change in member accounts averaged over the three year period, excluding Successor fund Transfers (SFTs) and account consolidations.

9.2 The RSE Net Cash Flow Ratio is members' benefits flows in less members' benefits flows out as a percentage of cash flow adjusted net assets averaged over the three year period, excluding SFTs.

9.3 The RSE Net Rollover Ratio is rollovers in less rollovers out as a percentage of cash flow adjusted net assets averaged over the three year period, excluding SFTs.

## Commentary

The performance indicator measures the fund’s growth and ability to deliver scale benefits to members against other funds.

The performance indicator, which is within our tolerance level, is based on an equal weighting of the above metrics.

Therefore, we are comfortable that the scale of the product and the fund does not disadvantage members.

## LIQUIDITY

**Outcomes** Benefit and rollover requests can be met in a timely manner from investments and insurance policies.

Our product's performance relative to comparable products

Metrics	Ref	Metric Label	Value	Tolerance	Target
	10.1	Investment liquidity in a GFC scenario	100.00%	40.00%	80.00%
	10.2	Insurer financial strength rating	A+	BBB	AA

10.1 Liquidity is a weighted average that is based on the liquidity in a Global Financial Crisis scenario and funds under management of the investment options available in the product. The table in Appendix 1 provides more information.

### Commentary

The performance indicator measures the fund’s ability to meet benefit and rollover requests in a timely manner.

We regularly monitor whether the investments would be able to meet cash requirements in extreme situations. Based on our analysis, we consider that benefits are supported by liquid investments.

As a result, we are comfortable that the level of liquidity risk for the product is acceptable.

## APPENDIX 1

### INVESTMENT OPTION INFORMATION

Investment Option	Inception Date	Growth Ratio	Member Assets	Investment Period			
				1 Year	3 Years	5 Years	10 Years
Future Super Balanced Impact Pension (for pension members)	2015-06-10	70%	\$29.9M	12.99%	6.02%	7.21%	
Weighted Average		70%	\$29.9M	12.99%	6.02%	7.21%	

This table provides information about the asset allocation, size and performance of the investment options available in the product.

## APPENDIX 2

### ACCOUNT BALANCE-BASED INVESTMENT METRICS

Time Frame	Account Balance Value					
	\$10,000	\$25,000	\$50,000	\$100,000	\$250,000	\$500,000
1	12.5%	12.9%	13.0%	13.1%	13.1%	13.1%
3	5.4%	5.9%	6.0%	6.1%	6.1%	6.2%
5	6.5%	7.0%	7.2%	7.3%	7.3%	7.4%

This table illustrates how the product's fee structure affects net returns for different account balances. The illustration is based on historic returns and the current fee structure.
