

# MANAGED PERSONAL SUPERPLAN MEMBER OUTCOMES ASSESSMENT

# INTRODUCTION

In this report, Equity Trustees Superannuation Limited publishes the results of our annual assessment of how well the Managed Personal SuperPlan product (the **product**) issued from Super Retirement Fund (the **fund**) provides member outcomes and promotes members' financial interests. The assessment is based on information as at 30 June 2023.

# **COVERAGE**

There are two versions of this Product which are summarised in the following table. In this report we have assessed the second version of the Product (SRFMPS002). Members holding the first version of the Product can obtain further information by visiting:

• Annual Performance Report Super Retirement Fund

Version	Product Code	Size	Total Fees	Investment options	Weighted average 1- year net return	Insurance cover
1	SGPS SRFMPS001	\$0.71M	1.35% p.a.	2	1.04%	No
2	SMPS SRFMPS002	\$42.5M	1.66% p.a.	3	8.78%	Yes

# **METHODOLOGY AND STRUCTURE**

In conducting this assessment, we compared the product to other choice superannuation products included in statistical data published by the Australian Prudential Regulation Authority (**comparable products**) using the criteria in Part 6 of the *Superannuation Industry (Supervision) Act 1993* and Prudential Standard SPS 515 *Strategic Planning and Member Outcomes*.

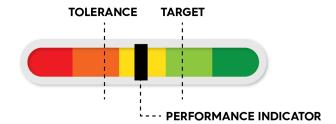

This report includes:

- our overall assessment of whether the product provides optimal member outcomes and promotes their financial interests;
- a dashboard that depicts our assessment of the product's market-relative performance for each outcome we aim to provide members;
- a table summarising the key metrics that we relied on when making this assessment; and
- our commentary on this performance that includes action items to improve suboptimal performance.

For each member outcome, the dashboard presents the relevant segment of market performance. The width of each segment is based on the range of market performance for each outcome and is specific to each outcome. The positioning of the black performance indicator bar against the colour coding is our assessment of how well the outcome has been delivered. The colour coding gives a visual representation of performance that moves from neutral (yellow) through orange to least tolerance (red), and in the opposite direction from yellow to the target (or green) area of the dashboard. The assessment of each member outcome is based on several equally-weighted metrics. Accordingly, if one metric is outside our tolerance level it doesn't automatically mean the entire member outcome is outside our tolerance level.

Example dashboard for illustrative purposes only

The target is generally the average position of the comparable products while the tolerance level is the trigger for us to consider any necessary actions to improve member outcomes.

Please visit our website to view a short video that provides more information about the operation of the dashboard.

# OVERALL ASSESSMENT

Having carefully considered the comparisons of the product with comparable products set out in this report, including the dashboards, metrics, commentary, and other relevant information available to us at the time of writing, we have concluded that as a result of the following factors the product is promoting members' financial interests:

- 1. the fees and costs that affect the return to members are not appropriate having regard to their financial interests;
- 2. the net returns for the product (i.e. returns after deducting all fees, costs and taxes) are not consistent with market rates;
- 3. the level of investment risk for the product is acceptable in relation to the net returns generated;
- 4. the investment strategy for the product is appropriate;
- 5. the options, benefits and facilities offered in the product are appropriate for members;
- 6. the insurance premium charged for the product does not inappropriately erode members' account balances;
- 7. the insurance strategy for the product is appropriate; and
- 8. the scale of the product and the fund does not disadvantage members.

# **ACTION ITEMS**

To reduce fees and improve net returns, we:

- increased the allocation of growth assets;
- secured fee reductions in December 2022;
- secured further fee reductions in December 2023, which will be reflected in the product's next Member Outcomes
  Assessment as at 30 June 2024. For further information on the fee reductions, please visit the Fund's website
  <a href="https://resolutionlife.com.au/aia/help-and-support/forms-docs">https://resolutionlife.com.au/aia/help-and-support/forms-docs</a>;
- will continue discussions with Resolution Life to further reduce costs and bring the fees within our revised tolerance level; and
- will address fee reductions in the Fund's Strategic Business Plan for the financial years 2024-26.

# **DASHBOARD**

#### STRATEGIC CONTEXT

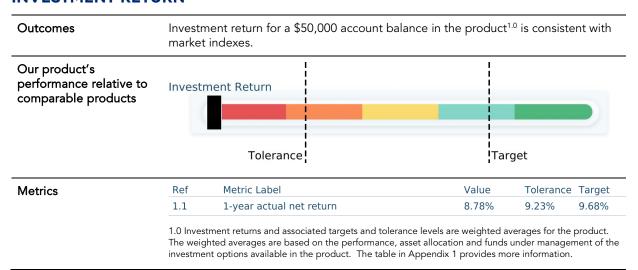

Working together with the fund's Promoter, Resolution Life, our purpose is to enhance retirement outcomes by providing products that allow members to accumulate retirement savings, receive retirement income and protect their assets.

To support this purpose, our goals for the fund are to enhance member's retirement balances, provide members with confidence through reliable and clear delivery of regulatory compliance, satisfy members through engaging member service that assists them grow their account balances, and grow member balances through competitive investment returns in line with stated objectives and targets.

The product is a choice accumulation product.

#### **INVESTMENT RETURN**

#### Commentary

The performance indicator measures the average investment return of all investment options over a 1-year period and is based on an equal weighting of all the metrics in the above table.

There were changes to the investment options in May 2022 and therefore there is no performance history to measure annual returns beyond 1-year. For further information on these changes please click here <a href="https://resolutionlife.com.au/content/dam/au/documents/aia/super-pensions/2022/19042022-srf-option-name-changes.pdf">https://resolutionlife.com.au/content/dam/au/documents/aia/super-pensions/2022/19042022-srf-option-name-changes.pdf</a>.

Appendix 1 displays the returns for each investment option available in the product and its weighted average returns over the 1-year period.

This commentary focuses on the 1-year weighted average return to 30 June 2023. When reading this commentary, it's important to bear in mind that past performance is not a reliable indicator of future performance.

Over the one year to 30 June 2023 the product's weighted average investment return was outside our tolerance level. The major detractors from investment performance over the one-year period were fees and asset allocation.

As a result, we are not comfortable that the product's net returns are consistent with market rates and therefore do not advance members' financial interests.

To reduce fees and improve net returns, we:

- increased the allocation of growth assets;
- secured fee reductions in December 2022;
- secured further fee reductions in December 2023, which will be reflected in the product's next Member Outcomes Assessment as at 30 June 2024. For further information on the fee reductions, please visit the Fund's website <a href="https://resolutionlife.com.au/aia/help-and-support/forms-docs">https://resolutionlife.com.au/aia/help-and-support/forms-docs</a>;
- will continue discussions with Resolution Life to further reduce costs and bring the fees within our revised tolerance level; and

will address fee reductions in the Fund's Strategic Business Plan for the financial years 2024-26.

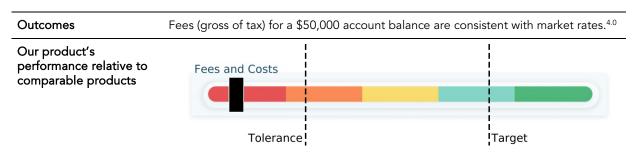

# **INVESTMENT RISK**

Outcomes Investment risk for a \$50,000 account balance in the product is consistent with Standard Risk Measure (SRM) <sup>2.0</sup> .
--

#### Commentary

There were changes to the investment options in May 2022 and therefore there is no performance history to measure annual returns beyond 1-year. For further information on these changes please click here <a href="https://resolutionlife.com.au/content/dam/au/documents/aia/super-pensions/2022/19042022-srf-option-name-changes.pdf">https://resolutionlife.com.au/content/dam/au/documents/aia/super-pensions/2022/19042022-srf-option-name-changes.pdf</a>.

#### **FEES AND COSTS**

Metrics	Ref	Metric Label	Value	Tolerance	Target
	4.1	Total fees	1.66%	1.47%	0.98%
		ees include a weighted average investment fee that is bas		stment fees ar	nd funds
under management of the investment options available in the product.					

#### Commentary

This table lists the product's total fees and costs (administration and investment fees and costs) that were paid during the year ending 30 June 2023. Other fees may be payable which are set out in the product's disclosure documents.

The performance indicator measures total fees and costs together against comparable products.

Total fees and costs were outside our tolerance level.

As a result, we are not comfortable that the total fees and costs were consistent with market rates and therefore did not advance members financial interests in the financial year ending 30 June 2023.

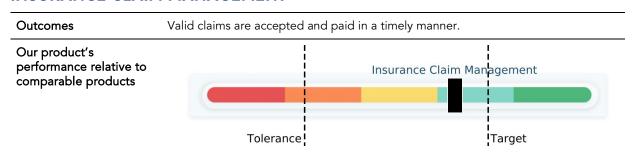

To reduce fees and improve net returns, we:

- secured fee reductions in December 2022 however, the benefit of these reductions is only partially reflected in these outcomes as the fee reduction occurred 6 months into the financial year;
- secured further fee reductions in December 2023, which will be reflected in the product's next Member Outcomes Assessment as at 30 June 2024;
- will continue discussions with Resolution Life to further reduce costs and bring the fees within our revised tolerance level; and
- will address fee reductions in the fund's Strategic Business Plan for the financial years 2024-26.

For further information on the fee reductions, please visit the fund's website <a href="https://resolutionlife.com.au/aia/help-and-support/forms-docs">https://resolutionlife.com.au/aia/help-and-support/forms-docs</a>.

# **INSURANCE CLAIM MANAGEMENT**

Metrics	Ref	Metric Label	Value	Toleranc	e Target
	6.1	Insurer's declined claims ratio - life cover	0.00%	4.75%	3.00%
	6.2	Insurer's average time to decision - life cover	3.07	2.50	2.00
	6.4	Insurer's average time to decision - TPD cover	7.27	13.75	8.00
	6.7	Insurance-related EDR complaints	0.54	2.25	0.75

- 6.4 TPD means "Total and Permanent Disablement".
- 6.7 EDR means "External Dispute Resolution"
- 6.7 This is the annual number of insurance-related complaints to the Australian Financial Complaints Authority per 10,000 member accounts.

#### Commentary

The performance indicator measures the acceptance of insurance claims, the timeliness of claim decision-making and the quality of the claims process against Comparable Products.

The performance indicator, which is within our tolerance level is based on equal weighting of all the metrics in the above table.

The insured benefits in this Product are supported by retail life insurance policies. For this suite of policies, in the year ended 30 June 2023 the Fund's insurer paid 34 death benefit claims and declined 0 death benefit claims.

The average time to decision for death claims is outside our tolerance level but is considered reasonable given that no claims were declined. Therefore, no action is required as a result of this assessment.

The number of insurance-related complaints that have been made to the Australian Financial Complaints Authority is within our tolerance level. No action is required as a result of this assessment.

As a result, we are comfortable that valid claims are accepted and paid in a timely manner.

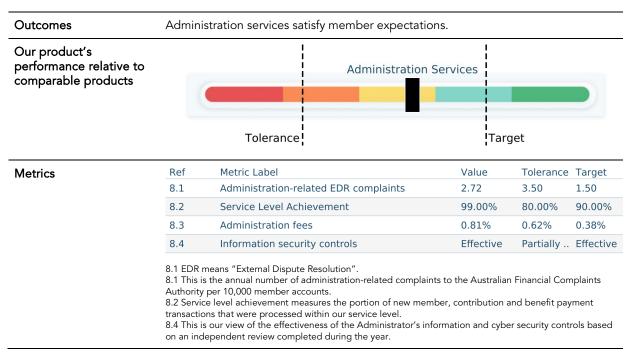

All insurance cover is voluntary. We believe that the appropriate level of insurance cover is a balance between the amount of cover required (based on the maintenance of the member's, and their dependants', standard of living in the event of an accident or illness) and the affordability of that cover for the member.

Members have the opportunity to seek personal financial advice if required, select their own level of insurance cover and cancel their cover if no longer required. Therefore:

- the insurance premiums charged for the product do not inappropriately erode members' account balances; and
- the insurance strategy for the product is appropriate.

# **MEMBER SERVICES**

#### Commentary

The performance indicator measures the delivery of administration services against our service levels, and against the cost of similar services for comparable products.

The performance indicator, which is within our tolerance level is based on equal weighting of the above metrics.

Administration fees and costs were outside our tolerance level. To reduce fees and improve net returns, we:

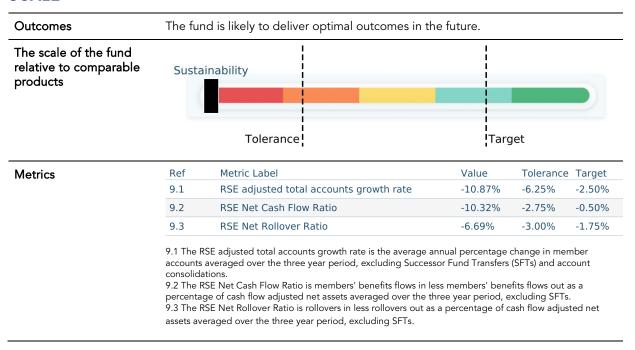

- secured fee reductions in December 2022;
- secured further fee reductions in December 2023, which will be reflected in the product's next Member Outcomes Assessment as at 30 June 2024;
- will continue discussions with Resolution Life to further reduce costs and bring the fees within our revised tolerance level; and
- will address fee reductions in the fund's Strategic Business Plan for the financial years 2024-26.

For further information on the fee reductions, please visit the fund's website <a href="https://resolutionlife.com.au/aia/help-and-support/forms-docs">https://resolutionlife.com.au/aia/help-and-support/forms-docs</a>.

As a result, we are comfortable that administration services satisfy member expectations because the high rate of service level achievement, the number of administration related complaints are within tolerance level and the Administrator's information and cyber security controls are effective.

# **SCALE**

# Commentary

The performance indicator measures the fund's growth and ability to deliver scale benefits to members against other funds.

The performance indicator, which is below our target and outside tolerance level is based on equal weighting of the above metrics.

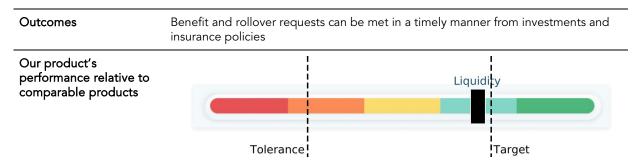

The fund is closed to new members and continues to be in run off with membership decreasing by 12% in FY23. It is expected to decrease at a similar rate over the next 3 years.

With total member benefits of \$2.6b and approximately 37,000 members, we believe that the fund has reasonable scale. This is supported by the acquisition of AIA Australia's Savings & Investments business by Resolution Life Australasia on 1 July 2023, which presents opportunities to improve member outcomes and support the fund's ongoing sustainability.

We will continue to monitor the impact that the expected reduction in fund size may have on member outcomes and take appropriate action if required.

# LIQUIDITY

Metrics	Ref	Metric Label	Value	Tolerance	Target
	10.1	Investment liquidity in a GFC scenario	87.34%	40.00%	80.00%
	10.2	Insurer financial strength rating	A+	BBB	AA

### Commentary

The performance indicator measures the fund's ability to meet benefit and rollover requests in a timely manner.

We regularly monitor whether the investments and insurance policies would be able to meet cash requirements in extreme situations. Based on our analysis, we consider that benefits are supported by liquid investments and an insurer with a strong capacity to meet its financial commitments.

As a result, we are comfortable that the level of liquidity risk for the product is acceptable.

# **APPENDIX 1**

# INVESTMENT OPTION INFORMATION

				Investment Period			
Investment Option	Inception Date	Growth Ratio	Member Assets	1 Year	3 Years	5 Years 1	0 Years
Growth	1989-05-12	72%	\$41.7M	8.95%
