

SMARTMONDAY PENSION - TRIS MEMBER OUTCOMES ASSESSMENT

INTRODUCTION

In this report, Equity Trustees Superannuation Limited (we, our, us) publishes the results of our annual assessment of how well the smartMonday PENSION – Transition to Retirement Income Stream product (the Product) issued from Aon Master Trust (the Fund) provides member outcomes and promotes members' financial interests. The assessment is based on information as at 30 June 2021.

METHODOLOGY AND STRUCTURE

In conducting this assessment, we compared the Product to other choice superannuation products included in statistical data published by the Australian Prudential Regulation Authority (Comparable Products) using the criteria in Part 6 of the *Superannuation Industry (Supervision) Act 1993* and Prudential Standard SPS 515 *Strategic Planning and Member Outcomes*.

This report includes:

- our overall assessment of whether the Product provides optimal member outcomes and promotes their financial interests;
- a dashboard that depicts our assessment of the Product's market-relative performance for each outcome we aim to provide members;
- a table summarising the key metrics that we relied on when making this assessment; and
- our commentary on this performance that includes action items to improve suboptimal performance.

For each member outcome, the dashboard presents the relevant segment of market performance. The width of each segment is based on the range of market performance for each outcome and is specific to each outcome. The positioning of the black performance indicator bar against the colour coding is our assessment of how well the outcome has been delivered. The assessment of each member outcome is based on several equally-weighted metrics. Accordingly, if one metric is outside our tolerance level it doesn't automatically mean the entire member outcome is outside our tolerance level.

Example dashboard for illustrative purposes only

The target is generally the average position of the Comparable Products while the tolerance level is the trigger for us to consider any necessary actions to improve member outcomes.

Please visit our [website](#) to view a short video that provides more information about the operation of the dashboard.

OVERALL ASSESSMENT

Having carefully considered the comparisons of the Product with Comparable Products set out in this report, including the dashboards, metrics, commentary, and other relevant information available to us at the time of writing, we have concluded that as a result of the following factors the Product is promoting members’ financial interests:

1. the fees and costs that affect the return to members are appropriate having regard to their financial interests;
2. the net returns for the Product (i.e. returns after deducting all fees, costs and taxes) are consistent with market rates;
3. the level of investment risk for the Product is acceptable in relation to the net returns generated;
4. the investment strategy for the Product is appropriate;
5. the options, benefits and facilities offered in the Product are appropriate for members;
6. the scale of the Product and the Fund does not disadvantage members.

DASHBOARD

STRATEGIC CONTEXT

Working together with the Fund’s Promoter, smartMonday, our purpose is to support members to meet their financial goals and grow their superannuation savings through smart, easy to understand actions which contribute to the long-term growth of their savings.

To support this purpose, our goals for the Fund are to deliver long term sustainable investment returns and fee structures, grow the fund organically and strategically, rationalise and simplify the operational structure, maintain strong governance, improve member engagement, and develop and offer innovative and needs-based solutions to improve member outcomes.

The Product is a choice transition to retirement product.

INVESTMENT RISK AND RETURN

Outcomes Investment risk and return for a \$50,000 account balance in the Product^{1.0} is consistent with market indexes.

| Metrics | Ref | Metric Label | Value | Tolerance | Target |
|---------|-----|------------------------------------------------|--------|-----------|--------|
| | 1.1 | 1-year actual net return | 16.77% | 13.37% | 16.60% |
| | 1.2 | 3-year actual net return | 6.82% | 6.33% | 7.41% |
| | 1.3 | 5-year actual net return | 7.12% | 6.83% | 8.03% |
| | 1.4 | 10-year actual net return | 7.27% | 6.73% | 7.57% |
| | 1.5 | Negative annual net returns over last 10 years | 1.69 | 2.00 | 1.00 |

1.0 Investment returns and associated targets and tolerance levels are weighted averages for the Product. The weighted averages are based on the performance, asset allocation and funds under management of the investment options available in the Product. The table in Appendix 1 provides more information.

1.1 – 1.4 The Product’s fee structure leads to different net returns for different account balances. The table in Appendix 2 provides more information.

1.5 Negative annual returns and associated targets and tolerance levels are weighted averages for the Product. The weighted averages are based on the performance, Standard Risk Measure and funds under management of the investment options available in the Product. Portions of years have been rounded up or down to a whole year.

Commentary

The performance indicator measures the average investment risk and return of the Product over one, three, five and 10-year periods and is based on an equal weighting of all the metrics in the above table.

Appendix 1 displays the returns for each investment option available in the Product and its weighted average returns over these periods.

This commentary focuses on the three-year weighted average return to 30 June 2021, and the weighted average number of negative annual returns for the 10 years to this date. When reading this commentary, it’s important to bear in mind that past performance is not a reliable indicator of future performance.

Over the three years to 30 June 2021 the Product’s weighted average investment return does not meet our target and is within our tolerance level. No remedial action required as a result of this assessment.

The investment options have undergone significant changes over the last several years with a view to improve active performance. This includes changes to asset allocation and the introduction of new asset classes and managers.

Investment risk, as measured by the weighted average number of negative annual returns for the Product over the 10 years to 30 June 2021 does not meet our target and is within our tolerance level. No remedial action is required as a result of this assessment.

Therefore, we consider the:

- investment strategy for the Product is appropriate because the weighted average returns are within our tolerance level; and
- investment risk is acceptable in relation to the net returns generated because the weighted average number of negative returns is within our tolerance level.

FEES AND COSTS

Outcomes Fees (gross of tax) for a \$50,000 account balance are consistent with market rates.^{3.0}

The Product’s
performance relative to
Comparable Products

| Metrics | Ref | Metric Label | Value | Tolerance | Target |
|---------|-----|---------------------|-------|-----------|--------|
| | 3.1 | Administration fees | 0.64% | 0.65% | 0.40% |
| | 3.2 | Investment fees | 0.58% | 0.85% | 0.60% |
| | 3.3 | Total fees | 1.23% | 1.50% | 1.00% |

3.0 The Product’s fee structure leads to different net returns for different account balances. The table in the Appendix 2 provides more information.

3.2 These fees include a weighted average investment fee that is based on the investment fees and funds under management of the investment options available in the Product.

Commentary

This table lists the Product’s administration and investment fees. Other fees may be payable which are set out in the Product’s disclosure documents.

The performance indicator measures administration and investment fees together against Comparable Products.

The performance indicator, which does not meet our target and is within our tolerance level is based on an equal weighting of each metric in the above table.

As a result, we are comfortable that fees and costs are consistent with market rates and therefore are appropriate having regard to members financial interests.

MEMBER SERVICES

| | | | | | |
|------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------|--------|-----------|--------|
| Outcomes | Administration services satisfy member expectations. | | | | |
| The Product's performance relative to Comparable Products | | | | | |
| Metrics | Ref | Metric Label | Value | Tolerance | Target |
| | 7.1 | Administration-related EDR complaints | 0.92 | 4.82 | 2.07 |
| | 7.2 | Service Level Achievement | 99.97% | 90.00% | 95.00% |
| | <p>7.1 EDR means "External Dispute Resolution". 7.1 This is the annual number of administration-related complaints to the Australian Financial Complaints Authority per 10,000 member accounts. 7.2 Service level achievement measures the portion of new member, contribution and benefit payment transactions that were processed within our service level.</p> | | | | |

Commentary

The performance indicator measures the delivery of administration services against our service levels.

The performance indicator, which meets our target is based on an equal weighting of the above metrics.

Service level achievement (99.97%) meets our target. No remedial action is required as a result of this assessment.

The number of complaints about administration services that have been made to the Australian Financial Complaints Authority meets our target. No remedial action is required as a result of this assessment.

As a result, we are comfortable that administration services satisfy member expectations because of the high rate of service level achievement and the number of administration related complaints is within tolerance level. Therefore, we consider the options, benefits and facilities offered in the Product are appropriate for members.

SUSTAINABILITY

Outcomes The Product and Fund are sustainable and likely to deliver optimal outcomes in the future.

| Metrics | Ref | Metric Label | Value | Tolerance | Target |
|---------|-----|----------------------------------|-----------|-----------|-----------|
| | 8.2 | Net member benefit flows p.a. | 0.53% | -29.51% | -1.52% |
| | 8.3 | Average account balance | \$152,304 | \$23,530 | \$124,315 |
| | 8.5 | Movement in member accounts p.a. | 2.41% | -36.39% | -8.01% |
| | 8.6 | Average member age | 44.6 | 58.00 | 48.70 |

Commentary

The performance indicator measures the Fund’s sustainability and likelihood of delivering optimal outcomes in the foreseeable future against other funds.

The performance indicator, which meets our target is based on an equal weighting of the above metrics.

Therefore, we are comfortable that the scale of the Product and the Fund does not disadvantage members.

LIQUIDITY

Outcomes Benefit and rollover requests can be met in a timely manner from investments.

| Metrics | Ref | Metric Label | Value | Tolerance | Target |
|---------|-----|----------------------------------------|--------|-----------|--------|
| | 9.1 | Investment liquidity in a GFC scenario | 92.14% | 40.00% | 80.00% |

9.1 Liquidity is a weighted average that is based on the liquidity in a Global Financial Crisis scenario and funds under management of the investment options available in the Product. The table in Appendix 1 provides more information.

Commentary

The performance indicator measures the Fund’s ability to meet benefit and rollover requests in a timely manner.

The performance indicator, meets our target. No remedial action is required as a result of this assessment.

We regularly monitor whether the investments would be able to meet cash requirements in extreme situations. Based on our analysis, we consider that benefits are supported by liquid investments.

As a result, we are comfortable that the level of liquidity risk for the Product is acceptable.
