

ACCELERATOR PERSONAL SUPERANNUATION PLAN

MEMBER OUTCOMES ASSESSMENT

INTRODUCTION

In this report, Equity Trustees Superannuation Limited (**we, our, us**) publishes the results of our annual assessment of how well the Accelerator Personal Superannuation Plan product (the **Product**) issued from the National Mutual Retirement Fund (the **Fund**) provides member outcomes and promotes members' financial interests. The assessment is based on information as at 30 June 2021.

METHODOLOGY AND STRUCTURE

In conducting this assessment, we compared the Product to other choice superannuation products included in statistical data published by the Australian Prudential Regulation Authority (**Comparable Products**) using the criteria in Part 6 of the *Superannuation Industry (Supervision) Act 1993* and Prudential Standard SPS 515 *Strategic Planning and Member Outcomes*.

This report includes:

- our overall assessment of whether the Product provides optimal member outcomes and promotes their financial interests;
- a dashboard that depicts our assessment of the Product's market-relative performance for each outcome we aim to provide members;
- a table summarising the key metrics that we relied on when making this assessment; and
- our commentary on this performance that includes action items to improve suboptimal performance.

For each member outcome, the dashboard presents the relevant segment of market performance. The width of each segment is based on the range of market performance for each outcome and is specific to each outcome. The positioning of the black performance indicator bar against the colour coding is our assessment of how well the outcome has been delivered. The assessment of each member outcome is based on several equally-weighted metrics. Accordingly, if one metric is outside our tolerance level it doesn't automatically mean the entire member outcome is outside our tolerance level.

Example dashboard for illustrative purposes only

The target is generally the average position of the Comparable Products while the tolerance level is the trigger for us to consider any necessary actions to improve member outcomes.

Please visit our [website](#) to view a short video that provides more information about the operation of the dashboard.

OVERALL ASSESSMENT

Having carefully considered the comparisons of the Product with Comparable Products set out in this report, including the dashboards, metrics, commentary, and other relevant information available to us at the time of writing, we have concluded that as a result of the following factors the Product is promoting members' financial interests:

1. the fees and costs that affect the return to members are not appropriate having regard to their financial interests;
2. the net returns for the Product (i.e. returns after deducting all fees, costs and taxes) are consistent with market rates;
3. the level of investment risk for the Product is acceptable in relation to the net returns generated;
4. the investment strategy for the Product is appropriate;
5. the options, benefits and facilities offered in the Product are appropriate for members; and
6. the scale of the Product and the Fund does not disadvantage members.

ACTION ITEMS

To reduce fees and improve net returns:

- we will continue discussions with Resolution Life to further reduce costs and bring the fees within our tolerance level; and
- fee reductions will be addressed in the Fund's Strategic Business Plan for the financial years 2023-25.

DASHBOARD

STRATEGIC CONTEXT

Working together with the Fund's Promoter, Resolution Life, the Fund's purpose is to enhance retirement outcomes for members through providing: new and different service options to simplify member effort, product and pricing strategies, and potential new business offerings in service of the membership.

To support this purpose, our goals for the Fund are to enhance member's retirement balances through reduced fees, provide members with confidence through reliable and clear delivery of regulatory compliance, satisfy members through engaging member service that assists them to grow their account balances, grow member balances through competitive investment returns in line with stated objectives and targets, and effective governance and risk management to protect members' interests.

The Product is a choice accumulation product.

INVESTMENT RISK AND RETURN

Outcomes Investment risk and return for a \$50,000 account balance in the Product^{1.0} is consistent with market indexes.

Metrics	Ref	Metric Label	Value	Tolerance	Target
	1.1	1-year actual net return	4.43%	3.78%	7.01%
	1.2	3-year actual net return	2.89%	3.13%	4.21%
	1.3	5-year actual net return	3.18%	3.28%	4.48%
	1.4	10-year actual net return	3.92%	4.24%	5.08%
	1.5	Negative annual net returns over last 10 years	0.06	1.00	0.00

1.0 Investment returns and associated targets and tolerance levels are weighted averages for the Product. The weighted averages are based on the performance, asset allocation and funds under management of the investment options available in the Product. The table in Appendix 1 provides more information.
 1.1 – 1.4 The Product's fee structure leads to different net returns for different account balances. The table in Appendix 2 provides more information.
 1.5 Negative annual returns and associated targets and tolerance levels are weighted averages for the Product. The weighted averages are based on the performance, Standard Risk Measure and funds under management of the investment options available in the Product. Portions of years have been rounded up or down to a whole year.

Commentary

The performance indicator measures the average investment risk and return of all investment options in the Product over one, three, five and 10-year periods.

The performance indicator, which does not meet our target and is within our tolerance level, is based on an equal weighting of all the metrics in the above table.

Appendix 1 displays the returns for each investment option available in the Product and its weighted average returns over these periods.

This commentary focuses on the five-year weighted average return to 30 June 2021, and the weighted average number of negative annual returns for the 10 years to this date. When reading this commentary, it's important to bear in mind that past performance is not a reliable indicator of future performance.

Over the five years to 30 June 2021 the major detractor from investment performance was fees.

To reduce fees and improve net returns:

- we will continue discussions with Resolution Life to further reduce costs and bring the fees within our tolerance level; and
- fee reductions will be addressed in the Fund's Strategic Business Plan for the financial years 2023-25.

Investment risk, as measured by the weighted average number of negative annual returns for the Product over the 10 years to 30 June 2021 does not meet our target and is within our tolerance level. No remedial action is required as a result of this assessment.

FEES AND COSTS

Outcomes Fees (gross of tax) for a \$50,000 account balance are consistent with market rates.^{3.0}

Metrics	Ref	Metric Label	Value	Tolerance	Target
	3.1	Administration fees	0.09%	0.65%	0.40%
	3.2	Investment fees	1.99%	0.85%	0.60%
	3.3	Total fees	2.08%	1.50%	1.00%

3.0 The Product's fee structure leads to different net returns for different account balances. The table in the Appendix 2 provides more information.

3.2 These fees include a weighted average investment fee that is based on the investment fees and funds under management of the investment options available in the Product.

Commentary

This table lists the Product's administration and investment fees. Other fees may be payable which are set out in the Product's disclosure documents.

The performance indicator measures administration and investment fees together against Comparable Products.

The performance indicator, which is outside our tolerance level, is based on an equal weighting of each metric in the above table.

As a result, we are not comfortable that the current fees and costs are consistent with market rates and therefore, do not advance members' financial interests.

To reduce fees and improve net returns:

- we will continue discussions with Resolution Life to further reduce costs and bring the fees within our tolerance level; and
- fee reductions will be addressed in the Fund's Strategic Business Plan for the financial years 2023-25.

MEMBER SERVICES

Outcomes Administration services satisfy member expectations.

The Product's performance relative to Comparable Products

Metrics	Ref	Metric Label	Value	Tolerance	Target
	7.1	Administration-related EDR complaints	2.93	4.82	2.07
	7.2	Service Level Achievement	70.03%	90.00%	95.00%

7.1 EDR means "External Dispute Resolution".

7.1 This is the annual number of administration-related complaints to the Australian Financial Complaints Authority per 10,000 member accounts.

7.2 Service level achievement measures the portion of new member, contribution and benefit payment transactions that were processed within our service level.

Commentary

The performance indicator measures the delivery of administration services against our service levels.

The performance indicator, which does not meet our target and is within our tolerance level, is based on an equal weighting of the above metrics.

Service level achievement (70%) is outside our tolerance level. The major contributor to this is the Fund's separation from the AMP Group, which has delayed the processing of benefit payments. Although our 5-day service level has not been achieved, benefit payments are generally made within the longer (30-day) timeframe allowed for choice products under the superannuation law. We continue to work with Resolution Life to improve service levels in the interests of members.

The number of complaints about administration services that have been made to the Australian Financial Complaints Authority does not meet our target and is within our tolerance level. No remedial action is required as a result of this assessment.

As a result, we are comfortable that administration services satisfy member expectations because the number of administration related complaints requiring external remediation is within our tolerance level, and transactions are being processed in accordance with our service level or the superannuation law. Therefore, we consider the options, benefits and facilities offered in the Product are appropriate for members.

SUSTAINABILITY

Outcomes The Product and Fund are sustainable and likely to deliver optimal outcomes in the future.

The sustainability of the Product and Fund relative to Comparable Products

Metrics	Ref	Metric Label	Value	Tolerance	Target
	8.2	Net member benefit flows p.a.	-9.70%	-29.51%	-1.52%
	8.3	Average account balance	\$23,878	\$23,530	\$124,315
	8.5	Movement in member accounts p.a.	-9.72%	-36.39%	-8.01%
	8.6	Average member age	56.6	58.00	48.70

Commentary

The performance indicator measures the Fund’s sustainability and likelihood of delivering optimal outcomes in the foreseeable future against other funds.

The performance indicator, which does not meet our target and is within our tolerance level, is based on an equal weighting of the above metrics. No remedial action is required as a result of this assessment.

As the Fund is closed to new members, movements in member accounts and the average member age are expectedly below our targets. We expect these indicators will move further away from our targets as members move closer to retirement.

With total member benefits of \$6.4b and almost 222,000 members, the Fund retains sufficient scale to support member outcomes into the future. Nevertheless, we continue to monitor the impact that the expected reduction in Fund size may have on member outcomes.

Therefore, we are comfortable that the scale of the Product and the Fund does not disadvantage members.

LIQUIDITY

Outcomes Benefit and rollover requests can be met in a timely manner from investments and insurance policies

The Product’s performance relative to Comparable Products

Metrics	Ref	Metric Label	Value	Tolerance	Target
	9.1	Investment liquidity in a GFC scenario	95.67%	40.00%	80.00%
	9.2	Insurer financial strength rating	A-	BBB	AA

9.1 Liquidity is a weighted average that is based on the liquidity in a Global Financial Crisis scenario and funds under management of the investment options available in the Product. The table in Appendix 1 provides more information.

Commentary

The performance indicator measures the Fund's ability to meet benefit and rollover requests in a timely manner.

The performance indicator does not meet our target and is within our tolerance level. No remedial action is required as a result of this assessment.

We regularly monitor whether the investments and insurance policies would be able to meet cash requirements in extreme situations. Based on our analysis, we consider that benefits are supported by liquid investments and an insurer with a strong capacity to meet its financial commitments.

As a result, we are comfortable that the level of liquidity risk for the Product is acceptable.

APPENDIX 1

INVESTMENT OPTION INFORMATION

Name	Growth Ratio	Size (\$M)	Investment Returns (% pa)			
			1 Year	3 Years	5 Years	10 Years
Accelerator Personal Superannuation Plan - Balanced	53%	\$0.3M	12.59%	6.14%	6.27%	6.24%
Accelerator Personal Superannuation Plan - Capital Gu..	19%	\$7.4M	0.90%	1.74%	1.96%	3.09%
Accelerator Personal Superannuation Plan - Cash	0%	\$0.0M	0.29%	0.62%	0.73%	1.41%
Accelerator Personal Superannuation Plan - Equity	100%	\$0.8M	30.11%	10.26%	11.17%	8.67%
Accelerator Personal Superannuation Plan - Fully Guara..	19%	\$2.7M	0.90%	1.74%	1.96%	3.09%
Accelerator Personal Superannuation Plan - Managed	71%	\$1.1M	17.13%	7.59%	8.11%	7.70%
Accelerator Personal Superannuation Plan - Property	85%	\$0.0M	12.69%	5.14%	5.70%	7.53%
Weighted Average	30%		4.43%	2.89%	3.18%	3.92%

This table provides information about the asset allocation, size and performance of the investment options available in the Product.

APPENDIX 2

ACCOUNT BALANCE-BASED INVESTMENT METRICS

Time Frame	Account Balance Value					
	\$10,000	\$25,000	\$50,000	\$100,000	\$250,000	\$500,000
1	4.1%	4.3%	4.4%	4.5%	4.5%	4.5%
3	2.5%	2.8%	2.9%	2.9%	3.0%	3.0%
5	2.8%	3.1%	3.2%	3.2%	3.2%	3.3%
10	3.6%	3.8%	3.9%	4.0%	4.0%	4.0%

This table illustrates how the Product's fee structure affects net returns for different account balances. The illustration is based on historic returns and the current fee structure.
